Office of the Sanitary Engineer³
to Government, Chepauk, Madras.
Dated 4th December 1949.

The Municipal Commissioner,
MANGALORE.

Sub: MANGALORE DRAINAGE SCHEME.

(F) The supplemental investigation of the drainage scheme sanctioned in G.O.No.2323, P.H., dated 18-7-1948 was completed and preparation of detailed plans and estimates for the comprehensive scheme of drainage will be taken up and completed in time so as to keep them ready for execution when its turn comes up. This scheme occupies a high rank in the list and its execution is proposed to be started in 1952-53 as per the 5 year plan approved in G.O.No.2503, P.H., dated 13-7-1949.

2. If, however, the Municipality is anxious to have any partial drainage scheme to be taken up for execution immediately ahead of the comprehensive; it must bear the entire cost of the partial scheme from its own funds without expecting any grant from Government.

3. The Bunder and Bazaar area seems to be the area that suffers most for want of a drainage scheme. It would roughly cost Rs.9 (Nine) lakhs to provide a partial scheme for this area. If you are agreeable to the condition laid down in paragraph A2 above you may address Government to issue necessary orders enclosing a copy of the resolution of the Council.

S.Rajagopalan,
Sanitary Engineer to Government.

Extract from the proceedings of a meeting of the Municipal Council, Mangalore held on 16th January, 1950.

Resolution No. 428.

x fante x

Read:- C5-23634/49 - Letter No. 16012/WKS/49-1 DG/39-D1 dated 4-12-49 from the Sanitary Engineer to Government stating that the supplemental investigation of the Mangalore drainage scheme sanctioned in G.O. 2323, P.H. dated 18-7-48 is complete, and that plans and estimates for a comprehensive scheme will be taken up and completed in time so as to keep them ready for execution, which is proposed to be taken up in 1952-53 as per the five year plan approved by Government and that if, however, the municipality is anxious to have any partial drainage to be taken up ahead of the comprehensive scheme, it must bear the entire cost from its own funds. The Sanitary Engineer states that the Bunder and Bazaar area seem to be the area that suffers most and that a partial drainage scheme for this area only would roughly cost Rs. 9 lakhs.

2. The Sanitary Engineer also states that if the Council is agreeable, the Government may be addressed with a resolution of the Council, for issue of necessary orders.

In view of the increasing incidence of filariasis and the imperative need to undertake at least a partial drainage scheme immediately this Council resolves that it is prepared to undertake a partial drainage scheme for the Bunder and Bazaar area provided the Government sanctions a loan of Rupees Nine lakhs being the cost thereof.

(2)/5/56

It has been made clear in para 3 of the Sanitary Engineer's letter dated 4-12-49 to the Municipality, copy enclosed with the above Government Memo and also sent to Government in this office Endorsement No. 5683 PWW/49-CR dated 4-1-50, that the Bundar and --Bazaar area suffers most for want of a drainage scheme. A partial scheme for this area is to be financed entirely from the funds of the Municipality without expecting Grant vide Education and Public Health Memo.No. 25035/49-1 Hl P.H. dated 26-7-49. But the Municipality wants the entire cost of the scheme i.e. approximately Rs. 9 lakhs to be met by the Government, by way of loan.

2. If the Municipality is really cannot meet even a part of the cost from their own funds the loan asked for may be advanced to the Municipality if deemed fit by Government, in view of the hardships, the resident of the area are put to, for want of drainage facilities.

Drainage scheme - Mangalore Mty - Partial Scheme - Execution at municipal cost.

Ref: From the Commr. Mangalore Mty, No.C5-23634/49 dated 1-2-50.

From the C.E., P.W.D. No.1344 PW/50-1 dated 4-3-50.

MEMORANDUM NO. 10040W-2/50-4 dated 11-4-50.

Mangalore is assigned the fourth place in the list of municipal drainage schemes to be newly provided in the southern circle, drawn up by the W.S. and D. Committee and approved by the Govt. In view of the decision in G.O.No. ¹⁴⁸⁸ ~~1588~~ P.H., dated 25-4-49 any scheme of drainage for the Mty., can be taken up now only if the Ml. Cl., is willing and is in a position to meet the entire cost of the scheme from its own funds, without the aid of a Govt. grant.

2. The Ml. Cl., Mangalore, has now proposed to take up a partial scheme of drainage for the Bunder and Bazar area, provided the Govt. sanction a loan for the purpose. The cost of such a partial scheme is stated to be Rupees nine lakhs.

3. On an examination of the financial position of the Cl., it is seen that ^{the} Cl. ~~had already agreed to increase the rate of w and d. tax levied in the Mty. from two p.c. p.a. to eleven per cent per annum to as already agreed to enable it to finance the w.s. scheme. It is seen that, if w. and d. tax is levied in the Mty., at eleven per cent per annum, the Cl. will be in a position to meet the annuity on the loan required for financing the partial drainage Scheme also.~~

4. It is however seen that the Cl. has not given effect to ^{the proposal to} increase the rate of tax as stated in para 3 above. The Commr. is requested to state urgently when the rate of the w and d. tax levied in the Mty., will be increased to eleven per cent per annum as already agreed to, by the Cl. The question of sanctioning the preparation of plans and estimates for the partial drainage Scheme will be considered after

Ref. Government Memorandum No. 10040 W - 2 - 50 - 4
Health, dated the 11th April 1950.

p. 21. ingra

The council in its resolution No. 595 dated the
8th July 1950 has resolved to raise the rate of levy of
Water and Drainage tax by 1 1/4% of the annual value
per half year with effect from 1-4-1951. A copy of the
resolution is submitted herewith.

There is an accumulated sum of Rs. 230,294 under
Water and Drainage Fund as on 1-4-50, and during 1950-51
there will be a surplus Rs. 50,000 after meeting the expendi-
-ture under the said account. After enhancement of tax
from 1-4-1951 the yearly savings under water and
drainage fund will be not less than Rs. 100,000 per year
after meeting the present ordinary expenditure under
Water and Drainage fund. Presuming that both the schemes
would take a minimum time of 6 years at the earliest
for completion then there will be an accumulated fund
of Rs. 900,000 at the end of 1956-57 as shown below. At
this stage the council can review its financial position
and decide by what percentage the Water and Drainage
tax should be further enhanced to meet the annuities
for repayment of loans taken if any by them and maintenance
expenditure on the schemes if the schemes are already
opened by them.

Opening balance as on 1-4-50	Rs. 230,294
Add additions during 50-51	Rs. 50,000
Add -do- the next 6 years @)	Rs. 600,000
Rs. 100,000 per year)	
Total:	Rs. 880,294 or
say	Rs. 900,000

WATER-SUPPLY and Drainage Schemes - Mangalore Municipality - Execution of.-

Government Memo.No.10040/W2/50.4 dated 11-4-1950.
From the Commissioner, Mangalore Municipality, Al,
9479/50 dated 15th July 1950.

...

Memorandum No. 10040 W2/50-11 d 27-1-51.

The Municipal Council, Mangalore in its resolution No.595 dated 8th July 1950 has resolved to raise the rate of water and drainage tax by 2½ per cent per annum with effect from the 1st April 1951.

2. It is expected that the partial drainage scheme if taken up, may take about 3 years for its completion and that the comprehensive water supply scheme sanctioned in G.O.No.1798 Public Health dated 16th May 1949 on half grant basis, may take about five years for its completion. On an examination of the financial position of the Municipal Council it is seen that the Municipal Council will be able to find a total sum of Rs.4,85,090 from its own funds in the five years towards its share of the cost of the water supply scheme viz., Rs.24.20 lakhs. The Council will have to take a loan from Government to meet the balance of Rs.19,34,910 required towards the half cost of the scheme.

3. In order to find the annuity on a loan of Rs.19,34,910 repayable in 40 years with interest at 3½ per cent per annum and also to meet the annual maintenance charge (Rs.46,000) of the water supply scheme the Municipal Council will have to raise the water and drainage tax levied in the Municipality from 2 per cent to 6½ per cent per annum. If the partial drainage scheme also is to be taken up now along with the water supply scheme the Council must take a loan of Rs.9.0 lakhs ^{for} from the partial drainage scheme as no grant is admissible for the scheme and as all income from the water and

p 333 cf (P)

p 7 mfg

from the water and drainage account is to be set apart for water supply scheme. In-order to find the annuity on the loan of Rs.9.0 lakhs and also to meet the annual maintenance charges (Rs.15,000) of the drainage scheme, the Municipal Council will have to increase the rate of water and drainage tax by another 2 per cent per annum besides the increase of $4\frac{1}{2}$ per cent per annum for water supply scheme. However, if the additional taxation referred to above is levied in the Municipality early from 1st April 1951, a total additional taxation of 6 per cent per annum (i.e. from 2 per cent to 8 per cent per annum) will be sufficient for the Municipal Council to finance both the water supply and partial drainage schemes.

p. 7 mf

(Health) dated the 27th January 1951.

I am to submit a copy of council's resolution No.
958 dated the 26th May 1951 together with a copy of
Chairman's note dated the 21st May 1951 and to state as
follows:-

In Government Memorandum cited above, Government have
called for views of the council on Government's suggestion
to raise the rate of water & Drainage tax from 2% to 8% per
annum early from 1-4-51 in order to finance both the water
supply-scheme and the partial-drainage scheme.

But the council, has already submitted to Government
in this office letter No.9470/A1-50 dated the 15th July 50,
has raised the rate of water and drainage tax from 2% to 4 1/2%
per annum from 1-4-51. A copy of the notification dated the
17th Novr. 50 notifying the above increase is enclosed. Water and
Drainage tax is accordingly levied at 4 1/2% per annum from 1-4-51

The water and drainage tax having been already raised
to 4 1/2% per annum from 1-4-51 it is seen that the council will
be in a position to raise a sum of Rs.9.20 lakhs in a period of
5 years and hence it would be necessary for the council to go
in for a loan of Rs.15 lakhs only to meet its half share of cost
of the water supply scheme (24.20 - 9.20 lakhs) To finance
the expenditure on partial drainage scheme the council will have
to take further loan of 9 lakhs. To meet the expenditure
on annuities for repayment of the above mentioned 2 loans of 15
lakhs and 9 lakhs and the cost of maintenance of the 2 schemes
at Rs.46,000 and Rs.15,000 per annum respectively the council
holds the view that if water and drainage tax is levied at 4.4%
per annum the necessary funds required for the above purposes
could be found.

Hence the council after a mature consideration of Govern-
ment's suggestion to raise the water and drainage tax to 8%
per annum from 1-4-1951 have in their resolution dated the
26th May 1951 requested Government to re-examine the financial
position of the council in the light of Chairman's note dated the
21st May 1951 and issue necessary instructions in the matter.

Orders of Government are solicited in the matter.

Forwarded.

Chairman's Note.

f 33 ante

In Government Memorandum No. 10040-50-11 (Health) dated the 27th January 1951, Government have stated that the partial drainage scheme if taken up may take about three years for its completion and the comprehensive water supply scheme may take about five years for its completion. They have further stated that the municipal council will be in a position to find a sum of Rs. 4,85,090 from its own fund in five years time.

2 On reviewing the revised budget figures for 1950-51 and the available actual figures for 1950-51, the total receipts under property tax at 18% per annum (of which 2% represents water and drainage tax) can be safely taken to be Rs. 5,75,000 for 1950-51. The rate of property tax having been raised to 20% per annum (of which 4% represents water and drainage tax) with effect from 1-4-1951, the total receipts under property tax can be safely estimated to be Rs. 6,75,000 for 1951-52. On the basis of above figures the financial position of the council in five years period will be as follows :-

1. Closing balance under water and drainage account as on 31st March 1950.	Rs. 2,30,394	1,30,190 100,000 2,30,190
2. Add receipts under water and drainage account during 1950-51:-		
Gross receipts ..	Rs. 5,75,000 x 2/18	
	: Rs. 64,000/-	Rs. 54,000
Deduct for ordinary expenditure for 50-51:	Rs. 10,000/-	
Net receipts ..	Rs. 54,000/-	
3. Add receipts under water and drainage account during 1951-1952:-		
Gross receipts ..	Rs. 6,75,000 x 4 1/2 / 20	Rs. 1,25,750
	: Rs. 148,170	
Deduct for ordinary expenditure during 1951-1952:	Rs. 22,420/-	
Net receipts ..	: Rs. 125,750/-	
4(a) Add net receipts during the next four years (52-53, 53-54, 54-55, & 55-56) on the above basis.	Rs. 125,750 x 4	: 503,000
(b) Add increase in the course of above mentioned four years.	Rs. 7,000	
5. Total receipts at the end of five years including closing balance of 1949-50.	Rs. 920,144	

3 Thus at the end of five years time the council will be able to provide a sum of Rs. 9,20,144 or 9.20 lakhs. Hence the Council will have to go in for a loan of Rs. 15 lakhs only to meet the half share of cost of water supply scheme (Rs. 24.20 lakhs : 15 lakhs). The annuity for repaying a loan of Rs. 15 lakhs in 40 years at 3 1/2 % interest will be about Rs. 50,263 or 50,300. As the annual cost of maintenance of water supply scheme is estimated to be Rs. 46,000 the council will have to find a sum of Rs. 96,300 to meet the annual expenditure on water supply scheme. As 1% of the property tax works out to Rs. 33,000 per annum, to raise a sum of Rs. 96,300 per annum the council will have to levy water and drainage tax at 3% per annum.

4 If the partial drainage scheme is also taken up now along with water supply scheme the council will have to take another loan of Rs. 9,00,000 for the said purpose as no grant is admissible for drainage scheme and as all income from water supply and drainage account is to be set apart for water supply scheme.

In order to find the annuity on a loan of 9 lakhs (Viz Rs.30,180) and also to meet the annual maintenance charges of Rs.15,000 on the partial drainage scheme the council will have to levy a water and drainage tax of 1.4% per annum.

S 5 Thus the council will have to levy a total water and drainage tax of 4.4% to finance both the schemes mentioned above. To meet the ordinary annual expenditure on drain gang coolies and repairs of drains etc it is enough if the council raises the rate from 4.4% to 5 % per annum. If it is so raised an additional sum of Rs.19,800 per annum could be found for this purpose.

? 6 As council has already increased the water and drainage tax to 4.4% with effect from 1- 4- 1951 the council will have merely to raise the water and drainage tax rate by 1/2% per annum from 1- 4- 1952 in order to meet the expenditure on the two schemes and the ordinary routine expenditure on existing drains.

3 mile 1 As explained above it does not appear to be necessary to raise water and drainage tax to 8% per annum as pointed out in the Government Memorandum No.10040-W2-50-11 (Health) dated the 27th January 1951.

M 4 In this connexion the following points are brought to the notice of council. In the revised budget for 1950-51 a sum of Rs.18,220 has been provided for under drainage account to meet ordinary expenditure such as pay etc of drain gang coolies and maintenance and repairs of drains. But it is hoped that only a sum of Rs.10,000 would be sufficient to meet the actual expenditure for 1950-51. In the budget for 1951-52 a sum of Rs.22,420/- has been provided for under drainage account to meet the ordinary expenditure on drain gang coolies and maintenance and repairs of drains. In working out the percentage of water and drainage tax required to be levied to finance both the schemes mentioned above the expenditure on drain gang coolies and maintenance and repairs of drains have been deducted from the annual receipts from water and drainage tax. It is a point for consideration whether this expenditure is debitable to water and drainage account or to the General funds of the municipality. If it is not to be debited to water and drainage account the receipts under the said account will increase by an amount equal to the deductions made towards drain gang-coolies etc. In that case the present increased rate of 4.4% per annum of water and drainage tax is quite sufficient to meet the expenditure on both the schemes - Hence the Government may be apprised of the above facts and they may be ~~requested~~ to re-examine the financial position of the council in the light of the foregoing note and inform this council whether the present rate of water and drainage tax i.e. 4.4 per cent per annum should be increased further and if so by what percentage.

MANGALORE MUNICIPALITY.

ಮಂಗಳೂರು ಮುನಿಸಿಪಾಲಿಟಿ.

Notification under Section 80 of the Madras District Municipalities Act 1920 as amended.

ತಿದ್ದುಪಡಿಯಾದ ಮದ್ರಾಸು ಡಿಸ್ಟ್ರಿಕ್ಟು ಮುನಿಸಿಪಾಲಿಟಿಗಳ 1920ನೇ ಇಸವಿ Vನೇ ಆಕ್ಟಿನ ಸೆಕ್ಷನ್ 80ಕ್ಕೆ ಅನುಗುಣವಾಗಿ ಪ್ರಕಟಿಸಲ್ಪಟ್ಟ ನೋಟೀಸು.

It is hereby notified for the information of the public that the Municipal Council in its resolution No. 953, dated the 28th October 1950, has resolved to levy Water and Drainage Tax at 2½% of the annual value of the property per half year with effect from 1-4-1951. The said tax will be levied accordingly with effect from 1-4-1951.

Note:—The Municipal Council in its resolution No. 18 dated 28-1-'46 has already declared under the first proviso to sec. 81(1) that Sixty per cent of the Water and drainage tax represents tax for Water works and the remainder for drainage works.

Municipal Office,
Mangalore.
Dated 17-11-1950.

Ry: from the Commr Mangalore Mty

D.D. is 9479 / 50 d 31-5-51.

Memo NO: 10040 W2 / 50 - 15 d 28.7-51.

The commr Mangalore Mty is informed that as the execution of the me. W.S. scheme will be spread over a period of ^{five} years and that of the partial drainage scheme over a period of three years, the M.C. will have to take the loan required to meet its share of the cost of the schemes in instalments and not in one lump sum. ~~Taking into account~~ The loan to be taken in each year during the period of execution of the schemes, ~~the total loan~~ ^{required} for the schemes as shown in the statement appended ~~and the total amount of loan, which is~~ repayable in 40 annual instalments with $3\frac{1}{2}\%$ p.a. interest, will ~~be~~ ^{come to} Rs 24,75,900. The M.C. will have to find in all Rs 1,76,900 (Rs 1,15,900 annuity on the loan + Rs 61,000 maintenance charges for W.S. and D schemes) towards the schemes ~~every~~ annually.

In view of the proposal of the M.C. to debit the expenditure on the maintenance of drains in the Mty. to General account, and in view of the increased income from the tax on account of revision of assessments in the Mty, it is considered that it will be sufficient if the Council levies W. and D tax at $5\frac{1}{2}\%$ p.a. in all ^{with effect from 1-4-52.} for financing both the W.S. and partial drainage schemes.

The commr Mangalore Mty is requested to place the matter before the M.C. and forward to Govt the views of the M.C. in the matter.

Memorandum No.10040 W2/50-15 dated 28th July 1951

Sub: Water Supply and Drainage schemes-Mangalore Municipality-Execution of.

Ref: Government Memorandum No.10040 W2/50-11 dated 27-1-1951.
From the Commissioner, Mangalore Municipality, D.Dis.No.9479/50
dated 31-5-1951

The Commissioner, Mangalore Municipality is informed that as the execution of the Municipal Water Supply scheme will be spread over a period of five years and that of the partial-drainage scheme over a period of three years, the Municipal council will have to take the loan required to meet its share of the cost of the schemes in instalments and not in one lump sum. The loan to be taken in each year during the period of execution of the schemes as shown in the statement appended; and the total amount of loan, which is repayable in 40 annual instalments with 3 1/2 per annum interest, will come to Rs. 24,75,900. The Municipal Council will have to find in all Rs. 1,76,900 (Rs. 1,15,900 annuity on the loan + Rs. 61,000 maintenance charges for water supply and drainage schemes) towards the schemes annually.

In view of the proposal of the Municipal Council to debit the expenditure on the maintenance of drains in the Municipality, to General account, and in view of the increased income from the tax on account of revision of assessments in the municipality it is considered that it will be sufficient if the council levies water and Drainage tax at 5 1/2% per annum in all with effect from 1st April 1952 for financing both the Water Supply and partial drainage schemes.

The Commissioner, Mangalore Municipality is requested to place the matter before the Municipal Council and forward to Government the views of the Municipal Council in the matter.

Sir,

Subject:- Tax - property - Water supply and
Drainage tax - Increase of.

Ref. Government Memorandum No. 10040-W2/50-15,
dated the 28th July 1951.

With reference to the memorandum cited above
I am to enclose herewith a copy of the council's
resolution No. 1472, dated the 13th October 1951 and
state as follows :-

In Government Memorandum No. 10040/W2/50-11,
Health dated the 27th January 1951, Government informed
that in order to finance both the schemes (comprehensive
water supply scheme and partial drainage scheme for
Mangalore) this council will have to raise the rate of
water supply and drainage tax to 8 % per annum as against
the then existing rate of 2% per annum and the council
after mature consideration resolved to increase the rate of
Water and Drainage tax from 2 % to 4½% per annum from
1- 4- 1951 in its resolution No. 953 dated the 28th Octr.
1950. Accordingly the water & drainage tax is levied at
4½% per annum with effect from current year. In view of the
fact that the previous rate of 2 % has been increased to
4½% per annum so recently as from 1- 4- 1951 the council
in considering Government's last Memo dated the 28th July
1951 has resolved to give effect to the suggestion of
Government to further increase the rate to 5½% with
effect from 1- 4- 1952. The council is of opinion that if
the Water and Drainage tax is raised to 5½% per annum from next
year itself i.e. from 1- 4- 1952) the rate-payers are sure
to raise a hue and cry that the council is giving going on
increasing the taxes year after year without giving immediate
returns for taxes levied.

I request therefore Government will be pleased to approve
of the council's resolution enclosed herewith and proceed with
the two schemes referred to above.

Commissioner

FORWARDED.

Chairman, M.C.

Extract from the proceedings of the Mangalore Municipal council,
dated the 13th October 1951.

Resolution No. 1472. A1.14827/51. READ Govt. Memo No. 10040-W2/50-15
dated the 28th July 1951 stating that it is necessary to
increase the water and drainage tax to $5\frac{1}{2}$ % per annum from
1st April 1952 to meet the cost of water supply and partial
drainage schemes and calling for views of the Municipal council
in the matter and the Commissioner's note thereon.

With effect from 1- 4- 1951 the taxes are enhanced
by $4\frac{1}{2}$ %. Hence, so far as the remaining one per cent is
concerned it will be raised from 1- 4- 1953.

Health (W)

Drainage Scheme - Mangalore Municipality - Partial Scheme - Execution at municipal cost

From the Commr. Mangalore City; No. CS-23634/49, E.P.W.D. No. 13748/W/50-1, dt. 4.3.50

Mangalore is assigned the fourth place in the list of municipal drainage schemes to be newly provided in the Southern Circle drawn up by the W. San. Comm.tee and approved by the Govt. The drainage scheme for Mangalore according to the five year plan in which it is included, is to be taken up only in 1952-53. In view of the decision in G.O. No. 1488 P.H. dt. 25-4-49, any scheme of drainage for the city can be taken up now only if the M.C. is in a position to meet the entire cost of the scheme from its own funds and do without the aid of a Govt. grant.

2. The M.C., Mangalore, has now proposed to take up a partial drainage scheme for the Bunder and Bazar area provided the Govt. sanctions a loan for the purpose. The cost of such a partial scheme is stated to be Rupees nine lakhs. The remarks of the C.E. are at page 9 of L.A. may be requested to examine the financial position of the M.C. and advise whether it can finance the partial drainage scheme estimated to cost Rupees nine lakhs, without the aid of a grant from Govt.

3. It may be noted here that a W.S. scheme for this city is already under execution. The Govt. have committed themselves to a half grant for the W.S. scheme. The M.C. has also agreed to raise the house W. and D. tax levied in the city, from 2 p.c. to 11 p.c. p.a. to finance the W.S. scheme.

4. The file may be sent to L.A. for

Rs 9 lakhs required for the Partial drainage scheme repayable in 40 equal annual instalments at $3\frac{1}{4}\%$. Works out to Rs 40,525. As stated in para 3 on p1 ante the cl has agreed to increase the rate of W+D tax from 2% to 11% p.a. to finance the water supply scheme. It was originally estimated that the annuity of Rs 127,500 on a loan of Rs 24.20 lakhs ^{towards the cl's share of the cost of the W.S. scheme} and the maintenance charges of Rs 46,000 on the ^{W.S.} scheme can be met by the above 9%.

increase in the rate of W+D tax referred to above. ^{But} ~~On the basis of the revised~~

The tax registers ^{than the revenue and as a result of this revision} a 9% increase in the

W+D tax will fetch an additional income of ~~Rs~~ about Rs 2.75 lakhs. ~~the~~

~~This amount is sufficient to meet the annuity of the loan required for the water supply scheme. It will have therefore sufficient balance after meeting the financial requirements of the water supply scheme.~~

~~The annuity of Rs 40,525 on a loan of Rs 9 lakhs required for the Partial drainage scheme and the maintenance charges thereon can as well be met from the~~

~~above balances. No further additional taxation is necessary.~~

With these remarks the file may be returned to Health Dept.

~~Rs 27,350.

W

per annum as agreed to by it, it will get an aggregate income of Rs 3.36 lakhs. The annuity on the loan of Rs 24.2 lakhs required to meet the cl's share of the water supply scheme (if made repayable in 30 years with interest at $3\frac{1}{4}$ per cent per annum) comes to Rs 1,27,489. Including the annual maintenance charges (Rs 46,000) of the water supply scheme, the total amount required for the scheme comes to Rs 1,73,489 per annum. The annuity on the loan of Rs 9 lakhs for the drainage scheme under reference works out to Rs 40,525 only. The cl can easily find this sum from the surplus (Rs 3.36 lakhs minus Rs 1.73 lakhs) Rs 1.63 lakhs in the W & D Account when the W & D tax is levied at 11% per annum. More amount will be available for the drainage scheme if the loan required for the water supply scheme also is made repayable in 40 years. No additional tax is necessary for the drainage scheme.

The Chairman discussed this case with me. He said that there are practical difficulties in immediately raising the tax to 15% and that it will be possible to raise the tax to some extent now and later on to raise it to the extent necessary to finance the scheme. He will send a detailed letter with the Councils. resolution which we should examine.

20/6/50

19 Cf. Crro. 23017/50. from the Commr., Mangalore Mty.,
A, 9479/50 d. 15.7.50.

p. 23 of T.M. d. 8.8.50. to C.E., PWD.

p. 29 of Crro. 31083/50.. from the C.E., PWD. T.M. 1344 PWN/50-5
d. 12.9.50.

The file deals with the proposal of
the M.C. Mangalore to take up a partial drainage
scheme financed by the council with the help
of a loan from the Govt. In G.O 1298. P.H.
to. 333 of (P) d. 16.5.49 the Govt. have sanctioned the
execution of the Mangalore water supply scheme
estimated to cost Rs 48.41 lakhs on the
half grant, half loan basis. The maintenance
of the scheme is estimated to cost Rs 46,000. per
annum. When the ability of the council to
finance the scheme was examined it was found
that the council should raise its water and drainage
tax levied in the Mty. from 2% to 11%
per annum. The council agreed to raise the
rate accordingly bringing the total rate of
property tax to 26% per annum.

2. When L.A. was consulted regarding

to p 2-3-21 to the ability of the council to finance a loan of Rs 9
lakhs for the partial drainage scheme they
advised that the M.C. would be able to finance
the loan without further increase in tax if the
tax was raised to 11% per annum as already
agreed to. As it was found that the council
had not actually raised the rate of tax, the

in memo no 10040 W 2/50-4-50 d. 11-4-50 the Commr
was asked to report when the rate would be
increased. The council now states that it
can raise the rate of water and drainage tax
only by $1\frac{1}{4}$ % per half year i.e. $2\frac{1}{2}$ % per annum

The annual maintenance ~~cost~~ of
the partial drainage scheme is estimated to

Cost Rs 15000. ~~per~~ The scheme The execution of this scheme may take about 3 years from the date of commencement. The comprehensive water supply scheme which has just been taken up may take about 5 years for its completion.

In the circumstances it is to be re-examined whether the proposed increase of $2\frac{1}{2}$ percent for annum of water and drainage tax in the mty, will be sufficient to enable the council to find its share of cost (1) of the water supply scheme and (2) of both water supply and drainage schemes. Remarks of L.A. may be invited.

at

(Previous notes of this Dept. on pp.1-3 ante).

The note of Health Dept. on pp.5-6 ante may be perused. The file has come to this Dept. with reference to 'B' above viz., to what extent the rate of water and drainage tax will have to be raised in order

(1) to meet the Council's share of the cost of water supply scheme; and

(2) to meet the Council's share of the cost of both the Water Supply scheme and the partial drainage scheme.

Water Supply scheme. This scheme has already been sanctioned. The cost of the scheme is Rs.48.41 lakhs. The Council's share on half grant basis is Rs.24.20 lakhs. The cost of maintenance of the scheme after completion is Rs.46,000. The Water and Drainage Account has to its credit a sum of Rs.1,50,000 under investment and according to the B.E. for 1950-51 there will be a balance of Rs.1,29,890 in that account at the end of 1950-51. The Water and Drainage account is now working at a revenue surplus of Rs.41,040. During the five years of execution of the Water Supply Scheme there will be

$$40,525 + 15,000 = 55,525$$

see below
22.12.50

a surplus of Rs.2,05,200. Thus the Council will be able to find a total sum of Rs.4,85,090 from its own funds in the five years towards its share, (Rs.24,20) of the cost of the scheme. The balance required towards the half cost is Rs.19,34,910. This amount of Rs.19.35 lakhs the Council will have to take as a loan from Government. The annuity on this amount repayable in 40 years with interest at ~~3 1/4~~ $3\frac{1}{4}$ per cent per annum is Rs.87,130. Adding to this the maintenance charge of the scheme viz., Rs.46,000 the Council should find an annual ~~charge~~ of Rs.1,33,130. At present the Council levies a water and drainage tax of 2 per cent per annum and one per cent tax brings an income of Rs.30,565. At this rate, in order to secure an annual income of Rs.1,33,130 the Council will have to raise W&D tax by $4\frac{1}{2}$ per cent per annum and the Council is prepared to raise the tax by $2\frac{1}{2}$ per cent. This is not sufficient. The Council must raise the tax by $4\frac{1}{2}$ per cent ^{per annum} for the water supply scheme alone.

2. If the partial drainage scheme also is to be taken up now along with the water supply scheme the Council must take an entire loan of Rs.9 lakhs for that drainage scheme as no grant is admissible for the scheme and as all income from the water and drainage account is to be set part for water supply scheme. The annuity on the loan of Rs.9 lakhs repayable in 40 years with interest at $3\frac{1}{4}$ per cent per annum is Rs.40,525. Adding to this the maintenance charge of Rs.15,000 for the drainage scheme, the Council must fund another annual income of Rs.55,525 for the drainage scheme. For this, the Council must increase the rate of water and drainage tax by another $2\frac{1}{2}$ per cent per annum besides $4\frac{1}{2}$ per annum for water supply scheme.

3. With these remarks the file may be returned to Health Dept., ---

Health

Health (W2)

The notes from pages 5- to 9 above
may be read. With reference to "B" on page 6. ante
E.A. stated that the M.C. Mangalore will be
able to find a total sum of Rs 4,05,090 from its
own resources in the five years towards its
share (i.e. Rs 24.20 lakhs) of the cost of the M. water
supply scheme sanctioned on half grant basis.
~~and that~~ The balance required towards the half
cost will be Rs 19,34,910. They state that in order
to enable the M.C. to find the annuity on the
above amount ^{of loan} repayable in 40 years with $3\frac{1}{4}$ %
p.a. interest, and also to meet the annual
maintenance charge (Rs 46,000) of the scheme,
the M.C. will have to raise the Ward D tax
"X" on p. 7. ante levied in the M.C. from 2% to $6\frac{1}{2}$ %. The Council
is prepared to raise the tax only by $2\frac{1}{2}$ % p.a.
now.

p. 7. ante

They have ~~further~~ stated that if the partial
drainage scheme in question is also to be taken
up now along with the water supply scheme, the Council
must take an entire loan of Rs. 9.0 lakhs for
that scheme and that in order to enable the M.C.

W/ EA

10040/50

to fund the annuity on the above loan and also to meet the annual maintenance charges, Rs 15,000 of the drainage scheme, the ml. cl. will have to increase the rate of water and drainage tax by another 2% p.a. ^{for W.S. scheme} besides the increase of 4 1/2% p.a. referred to on page 9. ante. That is the W. and D. tax will have to be raised from 2% to 8 1/2% p.a. d.A. have further stated that if the additional taxation referred to above is levied in the Mty. early from 1-4-51, a total additional taxation of 6% p.a. (ie from 2% to 8% p.a.) will be sufficient.

p-7. ante

p-9. ante

The total rate of property tax levied in the Mty is 18% p.a. If the W. and D. tax is increased by 6% p.a. as suggested above, the total rate will be raised to 24%, which is within the conventional maximum of property tax. In the circumstances it is submitted for orders whether the ~~above~~ above position may be explained to the ml. cl. and its views obtained in the matter. Subject to approval, a draft memo is put up. Fin may see before issue.

p/p 33-34 CF Issued as memo NO 10040 Nr 50-11 d 27.1.51.
p 35 CF CNO 25611/51 from the Commr., Mangalore Mty.,
Dis NO 9479/50 d 31.5.51

Please see the reply from the Commr., Mangalore Mty at pages 39-44 CF to the memo at pages 33-34 CF.

The water and drainage tax levied in the Mty is $4\frac{1}{2}\%$ per annum, including the recent increase of $2\frac{1}{2}\%$ p.a. It is stated that with this levy, the Council will be able to raise a sum of Rs 9.20 lakhs in a period of five years and that it would be necessary for the Mty. to go in for a loan of Rs 15.0 lakhs only to meet its share of half the capital cost of the W.S. scheme (Rs 24.2-8.2 lakhs).

para 3 on p. 43 CF

To meet the finance the expenditure on partial drainage scheme the Council will have to take a further loan of Rs 9.0 lakhs. It is stated that to meet the expenditure on annuities for repayment of the above mentioned loans of Rs 15 lak and 9 lakhs and the cost of maintenance of the W.S. and drainage schemes at Rs 46,000 and Rs 15,000 per annum respectively, it would be sufficient if the ^{total} water and drainage tax is levied at 4.4% per annum (i.e. $3 + 1.4\%$). The Mty.

"5" on p. 44 CF.

C

~~Mangalore in its resolution no 928 d 26.5.51~~

Pointing it out that the council has already ^{been} levying the W. and D. tax at $4\frac{1}{2}\%$ p.a. the M.C. Mangalore in its resolution d 26.5.51 p 41 CF has requested Govt to reexamine the financial position of the M.C. in the light of the above note to 44 CF and ~~not~~ ^{to} issue necessary instructions ~~for~~ in the matter.

-be

It may ~~be~~ noted that the ~~accrual~~ accumulation under W.S. and drainage account, ~~is~~ ^{is} ~~estimated~~ ^{is} ~~by the council~~ ^{estimated} at Rs 9-20 lacs in a period of five years ^{only} on account of the present levy of $4\frac{1}{2}\%$ p.a. ~~has been taken~~ of W and D tax at $4\frac{1}{2}\%$ p.a. The annuities on the two loans mentioned on page 1. and the annual maintenance charges for both the W.S. and D scheme can be met only by an additional levy of W. and D tax, over and above the present levy of $4\frac{1}{2}\%$ p.a. The M.C. Council's view that with the present levy of W. and D tax at $4\frac{1}{2}\%$ p.a. both the W.S. and D schemes can be financed ~~is~~ does not seem to be correct. p 40 v 39

(Last seen by L.A. on pp.6-9 above)

Please see the notes of health Deptt. on pp.11-12 above. In reply to the memo on pp.33-34 c.f. the Commr., Mangalore Mity., has stated that the council is already levying a water and drainage tax of $4\frac{1}{2}$ per cent per annum from 1-4-51 and that the water supply and drainage schemes can be financed without any further increase in the rate of W. & D. tax. It is observed that there has been an ~~increase~~ increase in the current demand under the various taxes. The council will have to take the loan required to meet its share of the cost of the schemes in instalments and not in one lump sum as the ^{execs of 10} water supply scheme will be spread over for a period of five years and the drainage scheme over a period of three years. The council will have to meet the annuity on loans required for the water supply scheme from the second year after the ^{execution} scheme is started. The Commr. s presumption that the council will be able to accumulate the entire water and drainage tax collections during the five year period when ^{the} scheme will be under execution is not correct. Only such portion of the tax collections as is left after meeting the annuity on the loans taken in the previous year will be available to meet a portion of the council's share of the cost of the scheme in each year. From the statement at ~~IT~~ it will be observed that the total amount of loan required will be Rs.24,75,900/- (Rs.15,75,900 for water supply scheme and Rs.9,00,000 for drainage scheme). The annuity on this loan at $3\frac{1}{2}$ per cent per annum is Rs.1,15,900/- . Including the maintenance charges of Rs.61,000/- (Rs.46,000/- for water supply ~~and~~ scheme and Rs.15,000/- for drainage scheme) the council will have to find in all a sum of Rs.1,76,900/- towards the maintenance of water supply and drainage schemes and to meet th

10.1.52
21.1.52

annuity on the loans taken for the schemes. One per ~~percent~~ of water and drainage tax is estimated to fetch an income of Rs.33,000/-. It is sufficient if the council levies water and drainage tax at $\frac{5}{2}$ per cent per annum only ^{in all.} ~~as the income from this source will increase by the time the execution of water supply and drainage schemes is over on account of the quinquennial revision of tax registers which will come into effect on 1-4-54~~ The General Account of the council works at a substantial surplus. There is therefore no objection to the expenditure (about Rs.21,000/-) that is being incurred on maintenance of drains being debited to the General Account. The file may be returned to the Health Deptt.

Please see the notes of L.A. at

pages 13-14 ante. They have stated that the M.C. Mangalore will have to take the loan required to meet its share of the cost of the M.C. W.S. and D. schemes, in instalments and not in one lump sum as the execution of the W.S. scheme will be spread over a period of 5 years and that of drainage scheme over a period of three years. Calculating the loan to be taken in each year during the period of execution of the schemes (ie from 1951-52 to 1954-55) L.A. have worked out in the statement at (T), that the ~~loan~~ total the total loan for the schemes, repayable in 40 annual instalments with $3\frac{1}{2}\%$ per annum interest, to be Rs 24,75,900. They have stated that in view of the proposal of the M.C. to debit the expenditure (about Rs 21,000) on the maintenance of drains in the M.C., to General account and in view of the increased income from the tax on account of revision of assessments in the M.C., it would be sufficient if the Council levies W and D tax at $5\frac{1}{2}\%$ per annum ~~is~~ only in all, for financing the W.S. and D. schemes, as against their original recommendation of 8% p.a. in all (vide "Z" on pages 8-9 ante) and that the Council may be asked to increase the rate of W and D tax from $4\frac{1}{2}\%$ p.a. to $5\frac{1}{2}\%$ p.a. with effect from 1-4-52. It is for orders whether this may be accepted.

23/7/51

Please see the notes of Finance at pages 15-16 above. They have agreed with the views at 'X' on page 15 ante. It is for order whether the M.C. Mangalore may be asked to raise the rate of water and drainage tax from $\text{4}\frac{1}{2}\%$ p.a. to $\text{5}\frac{1}{2}\%$ p.a. as suggested at 'X' on page 15 ante. A draft memo is submitted for approval.

(Issued as Memo. No. 10040.W2/50-15 dated 28-7-1951.)

From the Commr. Mangalore Mty., Al. 14827/51 dated 22-10-1951.

C. No. 55550/51 pp. 55-57 c.f.

Please see the reply from the Commr. Mangalore Mty., at pp. 55-57 c.f. to the memorandum at p. 47 c.f. The M.C., Mangalore in its resolution No. 1472, dated 13-10-1951 has resolved to raise the water and drainage

p. 57 c.f.

tax which is levied at $4\frac{1}{2}$ per cent p.a., to $5\frac{1}{2}$ % p.a. with effect from 1-4-1953. The increase of the water and drainage tax to $5\frac{1}{2}$ per cent was suggested in order to enable the Ml.Cl. to finance both the water supply scheme and the partial drainage scheme for the Municipality, meeting half the capital cost of the water supply scheme (i.e. $\frac{48.41}{2} = 24.2$ lakhs) and the full cost of the drainage scheme (Rs.9 lakhs) from the Ml funds.

The execution of the Municipal Water Supply Scheme has been deferred pending decision over ^{the} alternative source for the water supply. The question of sanctioning a revised water supply scheme with Nethravathi river as source, which is estimated to cost Rs.80 lakhs is under consideration separately. In that connection the possibility of raising the water and drainage tax levied in the Mty. from $4\frac{1}{2}$ per cent to 11% p.a. bringing the total rate of property tax to 27% p.a. is being examined, for enabling the Ml. Cl. to find a sum of Rs.42.6 lakhs towards the capital cost of the scheme.

This file may lie over till a decision is reached on the question of increasing the water and drainage tax to 11% p.a. mentioned above.

In G.O.Ms.No.32, Health, dated 3-1-1952 the Government have since directed the C.E. to collect full particulars for the preparation of detailed plans and estimates for a revised water supply scheme for the Mangalore Mty. with Nethravathi river as source, which is estimated to cost Rs.80 lakhs roughly. The method of financing the revised scheme with reference to the Government's revised financial policy will be decided finally, only after the plans and estimates for the scheme are ^{received by} submitted to Govt. In order to enable the Ml. Cl. to finance a loan of Rs.25.5

25.5 lakhs towards the capital cost of the scheme it has been suggested to the Municipal Council to raise the rate of water and drainage tax levied in the Municipality from 4½ per cent to 9 per cent per annum (bringing the total rate of property tax to 25% p.a.). The Council's views are awaited.

note 1-1-52

The question of ^{Comprehensive} financing the partial drainage scheme for the Municipality ^{will be taken up in 1952-53. There is no} ~~which is estimated to cost Rs. 9.0 lakhs~~ ^{necessity for a partial drainage scheme. The N.C.C. may be} ~~may be further examined on receipt of the Council's reply~~ referred to above. ^{is} ~~is~~ formed accordingly.
